

A silhouette of a diver is centered in the upper half of the page, set against a vibrant blue background that transitions from a lighter turquoise at the top to a deep, dark blue at the bottom, suggesting an underwater environment. The diver is positioned as if looking down, with their head and equipment visible.

DIGITAL IMAGING

ADD-ON COURSE

UNDERWATER DIGITAL PHOTOGRAPHY & VIDEOGRAPHY COURSE

Underwater Digital Imaging is a fantastic skill to add-on to your Dive-Careers Professional Diving Internship... and with recent advances in camera and editing technology it is now more accessible than ever before!

The current shift in trend of DSLR cameras being used to capture images and film underwater means that what you learn on our courses will be valuable skills to gain future employment and generate an income within the diving industry.

Combine your underwater photography or videography course with our PADI Divemaster or PADI Dive Instructor training at any of our locations in our worldwide employment network!

As a dive instructor, completing one of our internships, we will also certify you as a PADI Underwater Photography / Videography Specialty Instructor. It is a great specialty to be able to teach, especially working on diving liveaboards and up market dive destinations.
